

Solutions Summer Adventure 2024

Week 1: July 8-12 Ocean Escape

Dive into fun with Solutions as we explore the ocean through fun experiments and crafts! Paperchain octopuses, a saltwater density experiment, and pipe cleaner starfish are some fun things we will be doing this week. Mr. Vinny will be joining us for a Big Bubble show on Thursday!

Week 2: July 15-19 Star Gazers

Solutions will soar to the stars while keeping our feet planted firmly on the ground. We will create galaxy-print paintings, bend pipe cleaner constellations, and observe the moon phases through a sweet treat! Mike Francis will bring Starlab, the inflatable planetarium dome, and a projector system that will bring the wonder and amazement of the night sky to our program!

Week 3: July 22-26 Prehistoric Adventures

Become a junior paleontologist this week at Solutions! Dig up some fun while we measure out dinosaur footprints, trace shadows, and make life-like dinosaur eye magnets. Animal Adventures will be coming this week with their Dino Adventures program to teach us about the relationship of today's animals with their prehistoric ancestors!

Week 4: July 29-August 2 Adventure Awaits

Come on a worldwide adventure with Solutions! This week we will be making postcards, erupting baking soda volcanoes, and launching paper airplanes all while learning about many different countries around the world. Flying High Dogs will be joining us with a K-9 frisbee show!

Week 5: August 5-9 Nature Detectives

Hands on Nature will help us discover some of our fascinating local bugs, such as beetles, worms, ladybugs, and caterpillars! Learning about them will help us better understand and appreciate their importance to our lives and their role in our ecosystem. Then join us for A BUG HUNT outside to discover where all of these insects and more can be found!

Daily Schedule

8:00-8:45 Arrival & Free Play

8:45-9:00 Morning Meeting/Bathroom

9:00-9:30 Outside/Playground (Waterslide on Wednesdays)
